

ENVIRONMENTAL MATERIAL ANALYSIS

i.am Table System

Components	Weight (kg)	Material	% Recyclable
Rail & Frame Leg Assembly Foot Glide Thread	4.11 8.34 0.08	Steel	100%
i.am Foot	2.86	Aluminium	100%
Grub Screws Screws Washers	0.02 0.15 0.01	Steel Alloy	100%
Figure Rail Spacer Figure Beam Caps Foot Glides	0.02 0.02 0.12	Polypropylene	100%
Finish	0.011	Powder Coat	100%
Packaging	0.1	Cardboard	100%
Total Weight	15.841		99.93% Recyclable By Weight

The materials used in the i.am are; mild steel, aluminium, polypropylene and steel alloy. Aluminium parts are polished. Mild steel components are painted using the powder coat method which does not utilise any solvents. No off-gassing of VOCs should therefore occur.
